ABOUT ME

Analytical full stack developer who always seeks to learn about new technologies with a great passion for numbers, programming and data visualization. Very curious about the digital transformation such as fintech, data science, machine learning and artificial intelligence.

EDUCATION

Instituto Tecnológico Autónomo de México - ITAM
Business Engineer | August 2013 - June 2018

ACADEMLO
Full Stack Web Developer | February 2022 - Present

EXPERIENCES

E-commerce with React
https://tech-ecommerce-mariomena.netlify.app/
A dummy e-commerce app of tech products in which it is possible to login, add products to the cart, delete and buy them.

Rick and Morty Wiki with React
https://rick-morty-rick.netlify.app/
This is a Rick and Morty's dictionary app. You can look up for the serie's characters depending on the location ID. It implements pagination.

Weather App with React
https://local-weather-app94.netlify.app/
App that shows the current weather of the city from which the app is called and other information as wind speed and clouds.
